

There has been some confusion about filling in the form from those who intend to **oppose** affordable housing i.e. Q1 B. They wonder why, having done so, they have been asked to answer the rest of the form on individual sites.

**The reason why those who *opposed* affordable housing are still asked to fill in the individual sites, is if the majority *supported* it, this would endorse going-ahead. Analysis of the questionnaire would then focus on the suitability of individual sites. It is important that *everyone* gives their assessment of the impact on residents near these sites to provide as complete a picture as possible of village opinion.**
